

HEATING

DRYAIR 650GTS DG 620,200 BTUs

The Flagro FMA-2300 Dual Fuel Direct-Fired Make Up Air Heater is proven to be one of the most effective ways for construction / industrial sites to control temperature, reduce air contaminants and keep moisture levels down. Having the ability to switch between Natural Gas or LP allows owners / operators more flexibility when bidding future projects that will require consistent dry heat. With the included remote thermostat, achieving evenly distributed, dry air is possible with the heater inside or outside.

FEATURES

- DRYAIR's patented CEC system pre-heats the combustion air and fuel to provide the burner with an ideal combustion environment in the widest range of ambient conditions.
- With 5,000 linear feet of hose on board or curing capability than the most common ground thaw units on the market.
- The 650GTS DG model comes standard with a diesel burner, but can easily be converted to run on propane or natural gas when those more economical fuel sources are available.

SPECIFICATIONS - DRYAIR 650GTS DG

BRAND	DryAir
DIMENSIONS	195"X95"X96"
FUEL SOURCE	Diesel, LP & NG
HEATING BTU'S	620,200
MODEL	650GTS DG
THERMOSTAT	Yes
VOLTAGE REQUIREMENTS	208v / 1 / 35amp
WEIGHT	6,996 lbs
